

Automatic CNC Positioning Systems

The fully automatic CNC plate positioning machines from SUNRISE are affordable systems with simple user friendly interfaces. The CNC positioning machines are available in 2 integrated sizes as well as factory installed on Punching Machines (PM) with a 20" or larger throat depth. The operation is CNC-controlled using a pendant mounted HUST Controller featuring easy programming and a virtually indestructible design. The operator simply positions the plate against the CNC-controlled hydraulic clamps and initiates the punch sequence.

Available Sizes (X x Y):

20" x 24" (Factory Installed on PM Models - 20" - 30" Throat)

24" x 47" - Model PM130-CNC - 130 Tons (Pictured Above)

24" x 40" - Model PM220-CNC - 220 Tons

All Machines include Hydraulic Punch Stripper

Positioning Speed (Both Axes): **390" per Minute** - Variable Speed

Accuracy: +/- **0.002"**

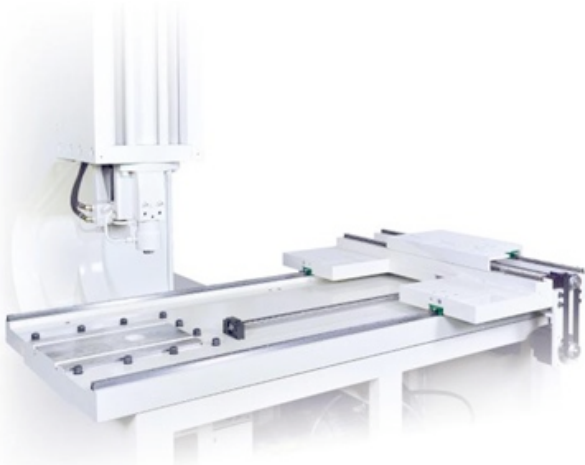

Trilogy Machinery, Inc. is committed to bringing the highest standards of professionalism, integrity and service in order to achieve a reputation as a leader in the metal fabricating machinery industry. We believe this dedication will benefit everyone- our customers and dealers, our team members and our suppliers.

Ultra-Rigid Design - Servo Motor controlled Ball Screws, Ball-Transfers and Dual linear rails for both X & Y Axes, Standard.

CNC System integrated on PM-88

HUST H2N Controller

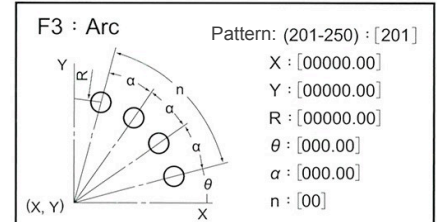

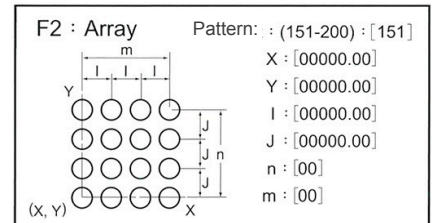

Pendant mounted for ease of use. Industrial Design. 100 Program Memory, each consists of up to 6 patterns such as an Array, Arc, Line or Customized Pattern.

HUST H4N Controller - Upgrade Large Color Screen Control. USB Storage Interface for unlimited Program storage. Ultra-reliable PLC; dust-free design.

Optional Triple Punch Attachment Fully integrated and pneumatically controlled via CNC Control for increased versatility!

Pre-programmed pattern templates in addition to fully customizable patterns as well as quick "go-to" programming for fast single-hole punch automation.
